AWARDS & CERTIFICATION

- 23 Awards & Certification

WE, KISEUNG INDUSTRY,
WILL TAKE OFF FOR THE
BEST ENTERPRISE
TOWARDS GLOBAL 100.

We have our roots in two-wheel vehicle and have grown for specialized company of automobile parts. We supply to ZF Sachs Korea, Hwashin, etc., KIA Motors, Hyundai Motors, It is supplied to Toyota, Honda, Renault, Volkswagen, Tesla, etc., and has deeply rooted, and established its Daegu Factory1, Factory2, Wachen Factory, Gyeongsan Factory, and GujiFactory to expand its branches long and wide.

Kiseung Industry affirmed the base by obtaining SQ mark certification, ISO/TS 16949 quality management system certificate and IATF16949 while selected for the specialized company for parts and components. Now, we will bring forth the valuable fruits for the highest company of global 100

Representative Director,
Song Sang-hoon

KISEUNG INDUSTRY IS AN ENTERPRISE OF THINKING, CHALLENGING, EXECUTING, CONFIRMING AND LEARNING.

We take the corporate value based on Hongik Humanism(Benefiting to human widely and extensively) for management philosophy.
We are making efforts for 3 satisfactions, 'Customer satisfaction, employee satisfaction and shareholder satisfaction' by means of management slogan, 'survival once profit made.'

MANAGEMENT GOAL

Management Philosophy

—
Creation of corporate value,
Hongik Humanism(Benefiting
to human widely and
extensively)

Quality Policy

—
Supply of the optimal
products(quality) for
customer orientation

Management Policy

—
Survival comes after making
profit, Customer satisfaction,
employee satisfaction and
shareholder satisfaction
->3 satisfactions

Corporation Value

—
3 best of manpower,
technology and market

Since 1975

Change 2018

KISEUNG

Great Company

KISEUNG INDUSTRY IS
A CORPORATE OF CREATIVE THINKING.

Based on “Think”, the employees of Kiseung Industry think productively, in advance, differently and newly, and during working to be a best company.

COMPANY MOTTO

Productive Think productively

Ahead Think in advance

Difference Think differently

New Think newly

Work Think and work

HISTORY

KISEUNG INDUSTRY MAKES NEW HISTORY COURSE ALWAYS.

Kiseung Industry, which wants to provide the highest products for customer orientation, will take social responsibilities by contributing to the development of automobile parts industry. We will make bigger frame in history in bigger world as a global company which draws the global attention based on our challenge and creative history.

1970

1975

- 05 Established Kiseung Industry Co., Ltd
- 12 Registered for the vendor of KIA Motors

1982

- 11 Completed Yangsan Factory at Gyeongnam

1988

- 04 Kiseung Industry converted to a corporate
- 06 Completed Daegu Factory

1989

- 11 Registered for the vendor of Hyundai Motors (D280)

1995

- 12 Registered for the vendor ZF SACHS Korea (Former, KIA Precision Co., Ltd)

2002

- 05 Registered for the vendor of Hwashin and supplied

2003

- 12 Obtained SQ mark (Hyundai/KIA Motors)

2007

- 06 Completed the 2nd factory and established welding and assembly line

2008

- 01 Certified for ISO / TS 16949 quality management system (UL Korea Certification Institute)

2011

- 08 Certified for safety and health management system (Korea Occupational Safety and Health Association)
- 12 Certified for informatization management system (Technology and Information Promotion Agency for SMEs)

2012

- 07 Established ERP step 2 and POP (Production management system)
- 10 Certified for SES-TIER2 (Renault-Samsung Motors)

2014

- 03 Certified for root industry (Korea National Ppuri Industry Center)
- 07 Patent registration-Torque measuring device for stud bolt
- 08 Established Wachon Factory

2015

- 02 Established Technology Center

2017

- 10 Established ICT convergence smart factor step 1

2018

- 01 Certified for IATF 16949 (DQS KOREA LLC Certificate Agency)
- 03 Completed Kyungsan Factory

2019

- 11 Patent application-VUO method for manufacturing trailing arms

2020

- 02 Designated as a technology specialized company (Ministry of Small and Medium Business)
- 03 Established Guji Factory

2020

MAIN PROCESS

KISEUNG INDUSTRY

EQUIPS THE FACILITIES FOR

AUTOMATED PRESS AND

WELDING.

The flagship items of Kiseung Industry are parts for chassis such as cross member, CTBA(rear CTBA), control arm and pedal, and suspension parts of outer tube assembly with knuckle bracket and spring seat.

Manufacturing Equipment(Automation ROBOT)

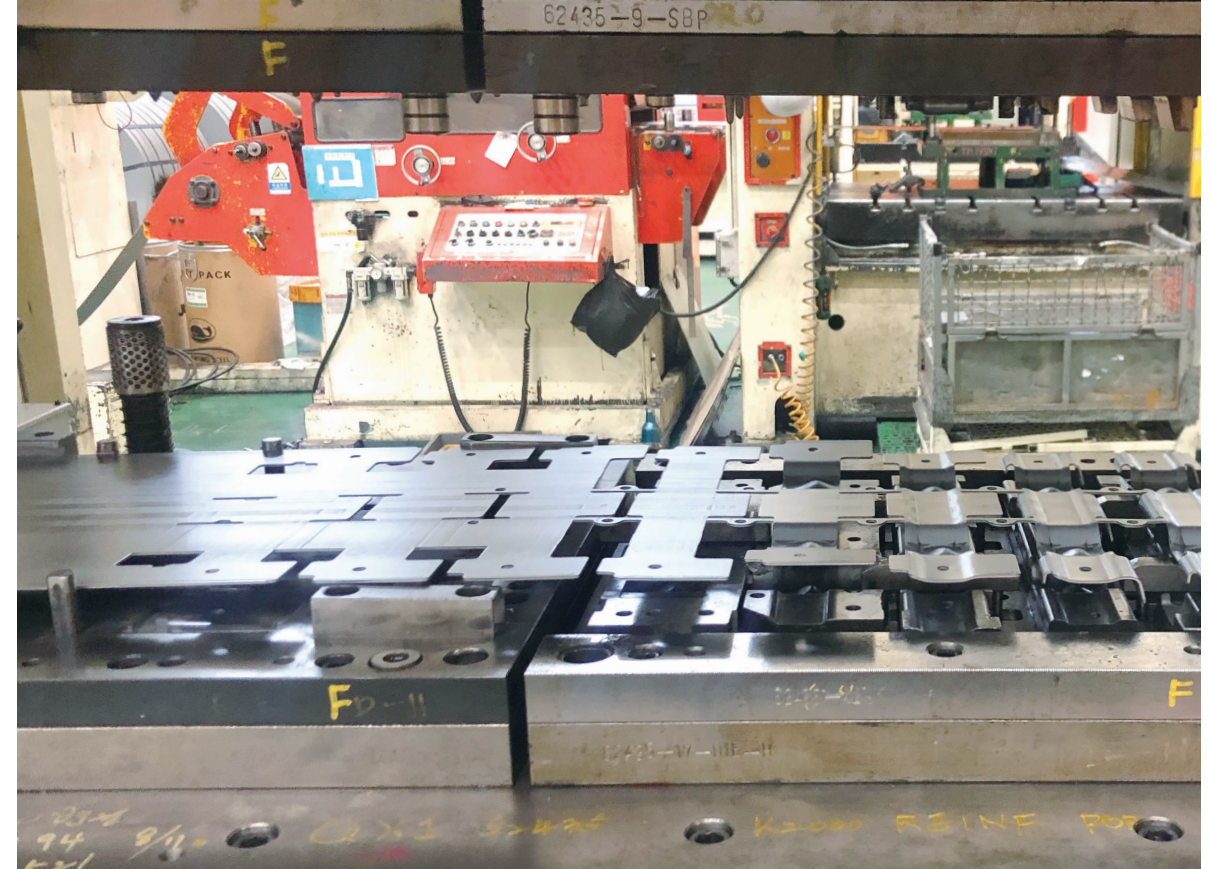

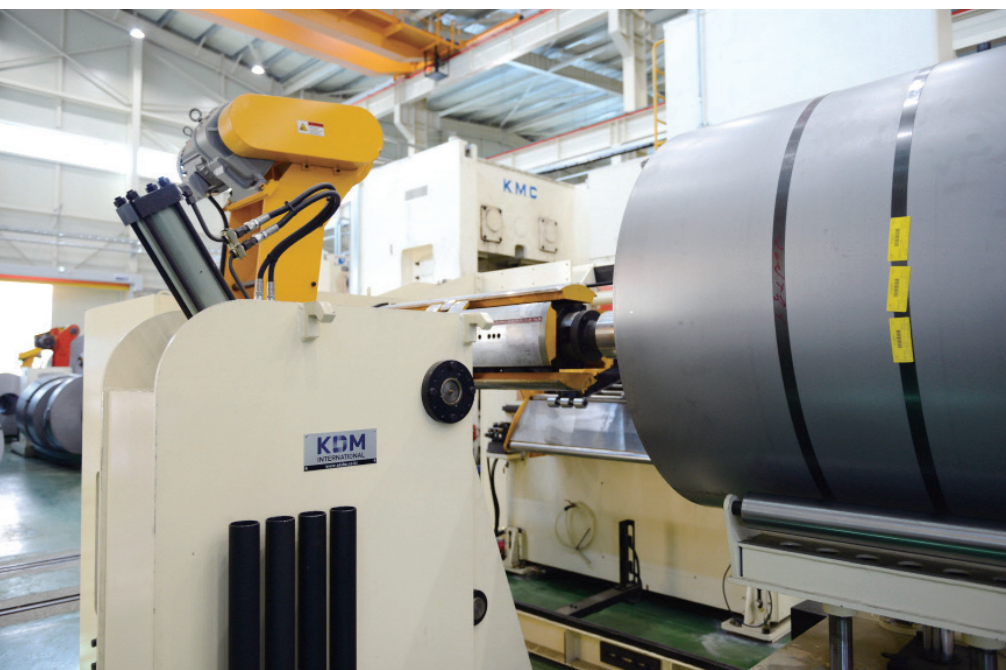

No	Product Name	Size	Quantity	Remarks
1	MECHA NICAL PRESS	2,300T	1	TRANSFER TYPE

20	WELDING ROBOT	CMT Welding line	74	
21	Hand'g ROBOT MH	MH225KG &50KG	62	MACHINES OF HYUNDAI HEAVY INDUSTRIES

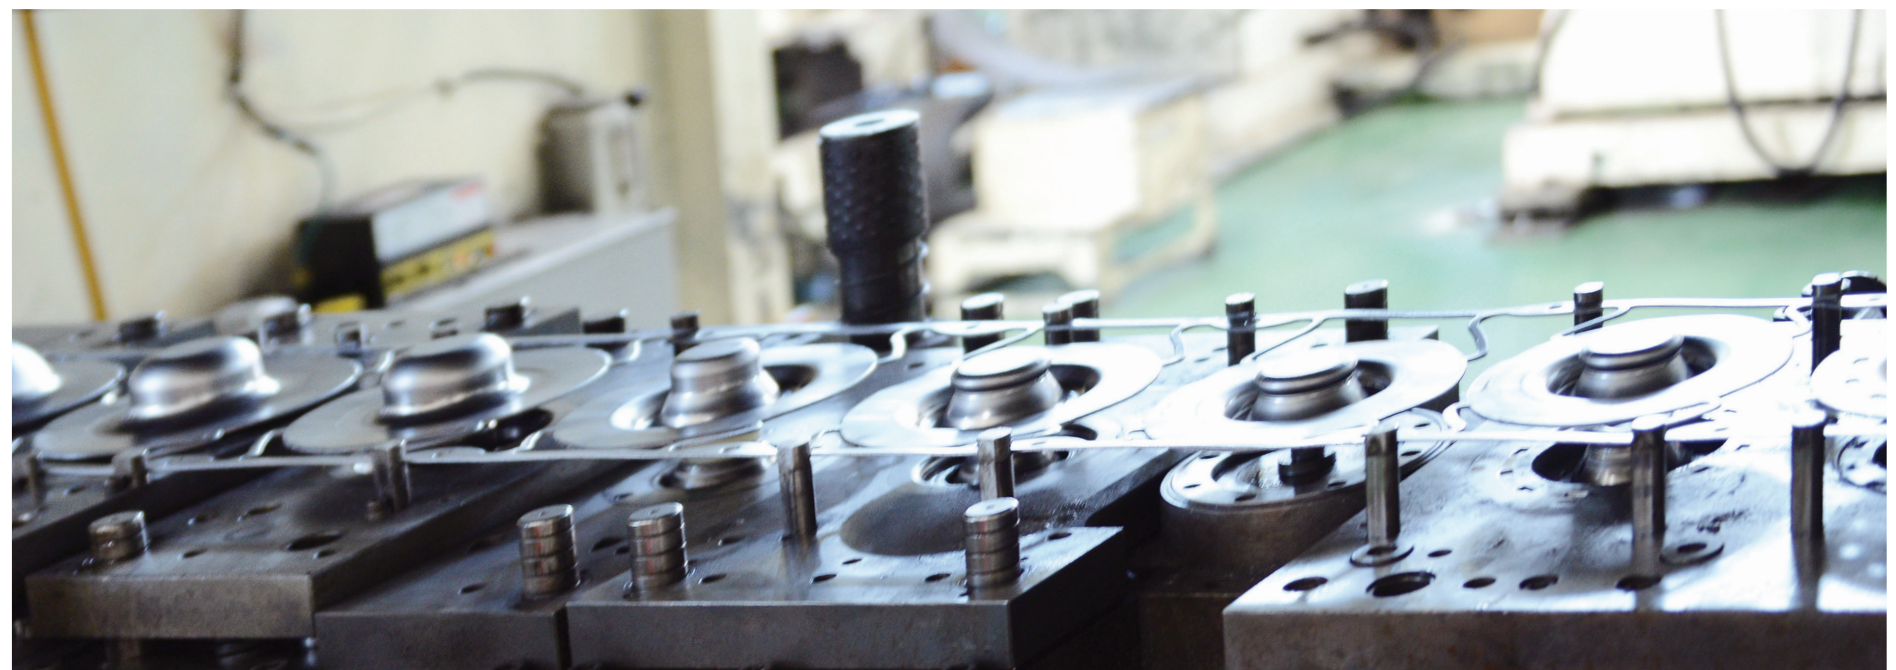

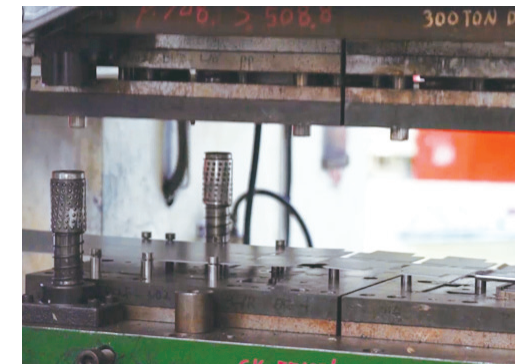

Raw material coil management

We control the first-in-first-out of the raw material with the barcode system of MES by classifying and stacking the raw material in lots for position and rack.

Progressive(Pro) line

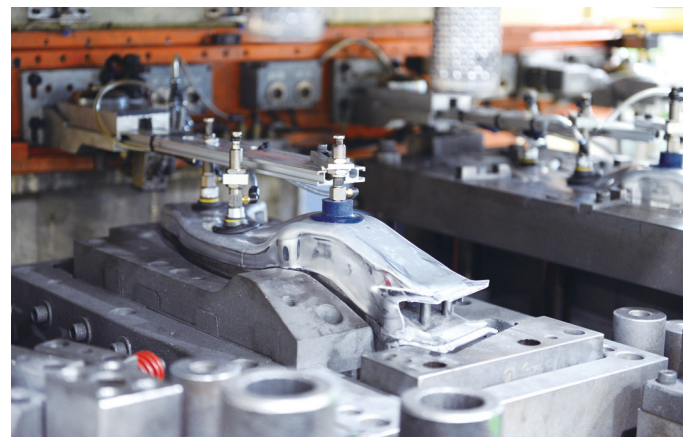

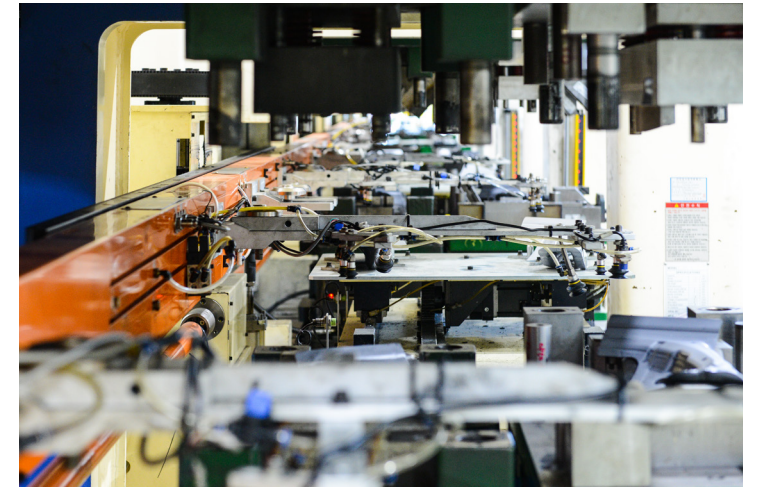

The pressing process is to form and process the steel plate in the shapes wanted by the customer. The core process of Kiseung Industry is to work and convey with automated facilities. Accordingly, it is available to acquire the price competitiveness through cost reduction and produce the highest quality products.

Shuttle press line

The shuttle press line is to produce the middle and large sized products. It is an automated technology for working/conveying a few press machines to a single shuttle bar concurrently.

Transfer press line

It is the highest complex automated line out of the press technologies. It can manufacture many small/middle/large products at once by moving the press machine mounted with a few molds to the built-in shuttle bar and work with robots or automatic devices for input/output. We enhanced the productivity in stable quality by acquiring many transfer press machines.

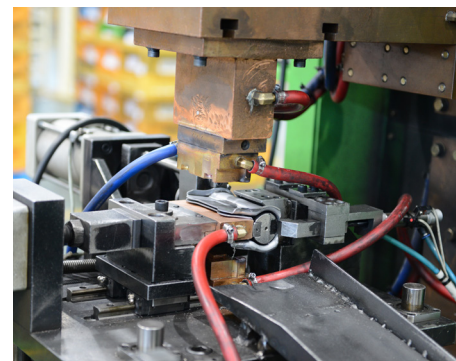

POWER	TYPE	PITCH	MOTION
2,300	H	6	3D
800	H	6	3D
500	SEMI H	3	3D
300	SEMI H	4	2D
250	C	3	2D

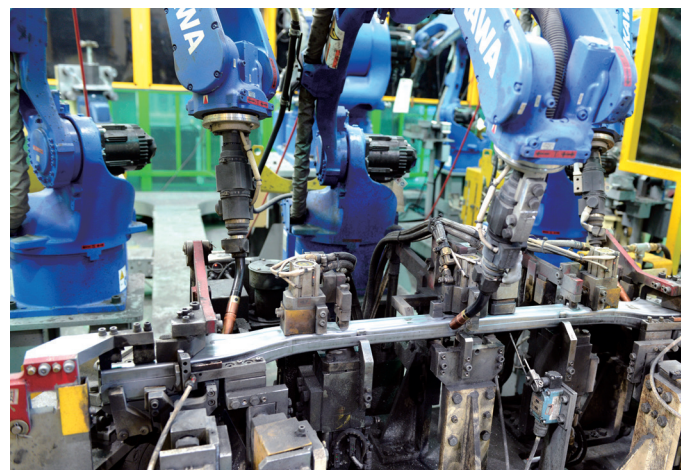

Robot press line

The line is composed of a few presses and robots which process the automatic stamping of middle/small sized products in various patterns.

Welding line

The welding line equips the automatic system with robots and it reduces the defect ratio remarkably by means of speedy and precise working.

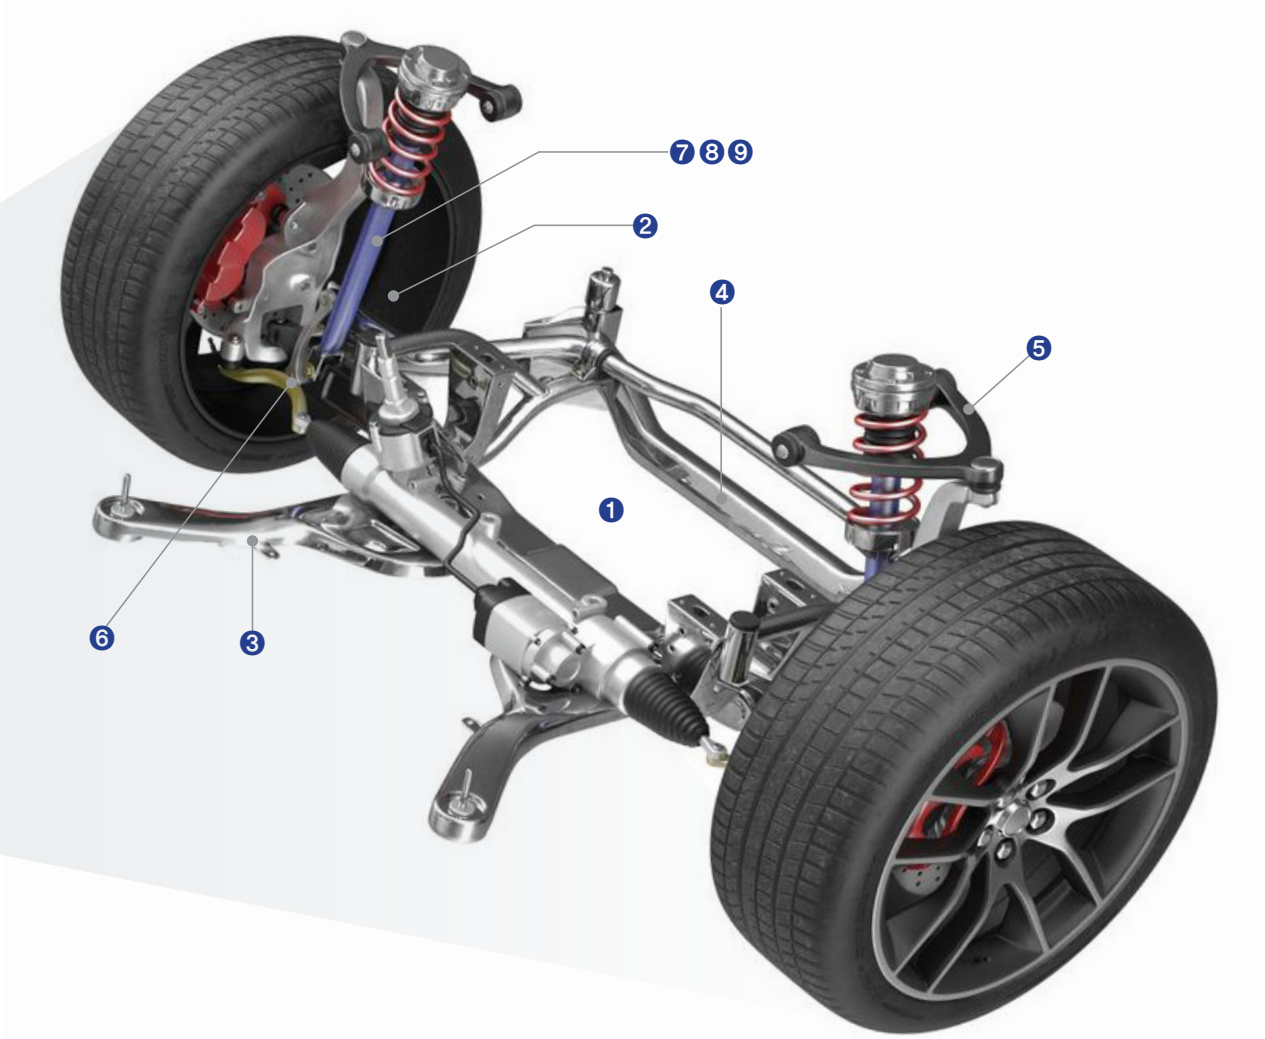

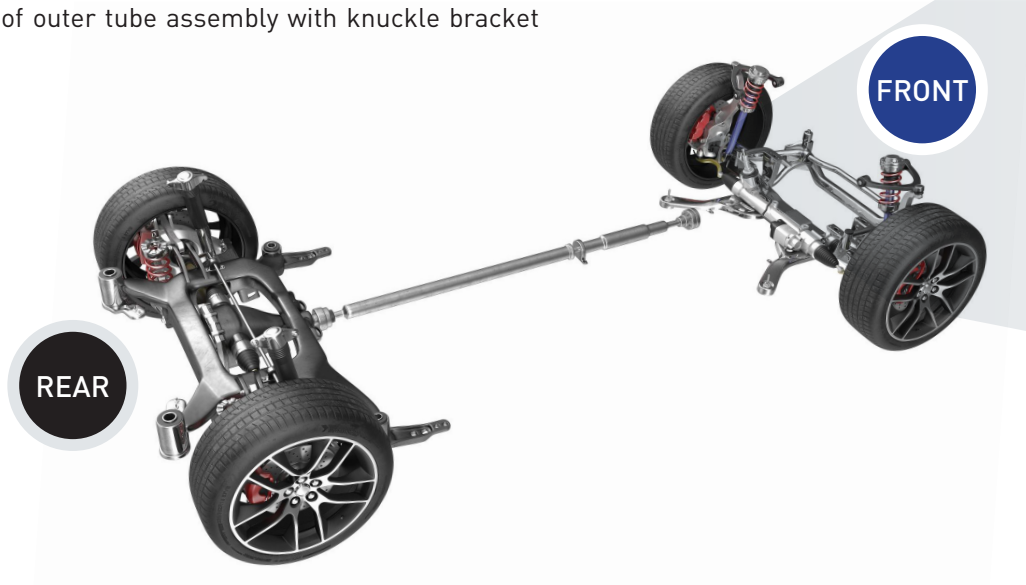

1st and 2nd Generation Platform Front Module (HMC/KMC Criteria)

DRAWINGS OF THE FINAL CAR'S PARTS PROCESSED BY KISEUNG INDUSTRY

The flagship items of Kiseung Industry are parts for chassis such as cross member, CTBA(rear CTBA), control arm and pedal, and suspension parts of outer tube assembly with knuckle bracket and spring seat.
