

Medical Battery

Battery pack for mobile X-ray

Mobile X-ray are used in world famous hospitals requires high-output battery with instantaneous output more than 20C-rate. This unique lithium battery for a mobile X-ray in the world is based on Incell's battery technology. The main feature is small and light, easy to move and long-term life span.

Feature

- Lithium-ion battery made by Samsung SDI
- Communication & monitoring
- High pressure, high density battery

Application

- Mobile X-Ray battery pack

Item	LIB 316-30Q-12
Nominal Voltage	316.8V
Nominal Capacity	12Ah
Lithium Battery Cell	SAMSUNG SDI
Weight	About 32kg
Size(WHD)mm	340x230x380
